SCIENTIFIC PROGRAM COMMITTEE

The CROI Scientific Program Committee (PC) is a team of experts in their given field who volunteer to organize the scientific program for CROI. Members are selected based on their area of scientific expertise and their commitment to the mission of the conference. Initial terms are up to 3 years; subsequent terms are based on previous participation and interest level. Members are nominated by the PC and approved by the CROI Foundation Board of Directors. The PC members are responsible for identifying topics and speakers that will ensure innovative programming; strategic planning; abstract review and program development; and organizing, conducting, or convening workshops, concurrent interactive sessions and symposia, and special sessions.

CONTINUING MEDICAL EDUCATION

Accreditation Statement

The International Antiviral Society (IAS–USA) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The IAS–USA designates this live activity for a maximum of 16 *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Objectives

After participating in CROI 2024, participants will be able to do the following as they relate to research in HIV, hepatitis viruses, SARS-CoV-2, and mpox and their related conditions:

- Describe basic science research advances in the understanding of viral infections, their pathogenesis, and their complications
- List the most recent findings from clinical trials and the implications of these data for state-of-the-art treatment and prevention strategies
- Describe current epidemiologic data on the prevalence of infection, transmission, treatment, and linkage to and retention in care in populations worldwide; the implications of these data for public health program planning; and current advances in biobehavioral prevention

Statement of Need

Since HIV was identified, the scientific response to the global pandemic has been a coordinated effort among basic researchers, clinical investigators, health care providers, epidemiologists, and community leaders to move information and potential treatment options from research to clinical trials out to affected communities as quickly as possible. CROI was founded in 1993 by researchers working in the field of HIV/AIDS and its complications as a science-focused forum for exchanging current research findings among their international peers. CROI continues to focus on scientific exchange, providing an environment in which basic science researchers, translational researchers, clinical investigators, epidemiologists, and public health experts meet to present and discuss the latest research into different facets of HIV and its complications, as well as selected other emerging infections, such as COVID-19 and mpox.

CME Credit Information **CME**

Physicians (MD, DO, and international equivalents) are eligible to receive CME credit for their participation in CROI. CME credits can be claimed for premeeting workshops, opening session lectures, plenary lectures, concurrent interactive sessions and symposia, and selected special sessions. CME credits cannot be claimed for oral abstract sessions, themed discussion sessions, certain special sessions, or poster sessions. For physician attendees certified by the American Board of Internal Medicine (ABIM), Maintenance of Certification (MOC) points are available for participation in CROI. Other researchers, practitioners, and attendees can receive a Certificate of Participation verifying their attendance, as required by the American Medical Association (AMA).

ABIM MOC Points

Successful completion of this CME activity, which includes participation in the evaluation component, enables the participant to earn up to 16 MOC points in the American Board of Internal Medicine's (ABIM) Maintenance of Certification (MOC) program. Participants will earn MOC points equivalent to the amount of CME credits claimed for the activity. It is the CME activity provider's responsibility to submit participant completion information to ACCME for the purpose of granting ABIM MOC credit.

Claiming CME Credits, ABIM MOC Points, or a Certificate of Participation

During the conference, links to the daily evaluations will be available on the CROI website. The overall evaluation with detailed instructions on how to claim credits will be provided after the conference. You will need the email address used to register for this conference and your confirmation number (on your badge) to access this page. To obtain CME credits, ABIM MOC points, or a Certificate of Participation for CROI, overall evaluation, posttest assessment, and claim forms must be submitted by April 8, 2024. Once the final evaluation and posttest are submitted, your certificate will be available on your IAS–USA profile on the IAS–USA website.

To determine the number of CME credits, ABIM MOC points, or hours of participation that can be claimed, calculate the time spent attending conference activities, including premeeting workshops, opening session lectures, plenary lectures, concurrent interactive sessions and symposia, and selected special sessions. For example, if you attended 2 plenary talks (8:30 to 9:30 AM) and a symposium (4:00 to 5:30 PM), you would have 2.5 hours to apply toward CME credits or ABIM MOC points (if applicable) for that day. At the end of CROI, please add the total hours you attended.

A CME/ABIM MOC hour worksheet can be found on the CROI website.

Disclosure of Financial Relationships

In the interest of maintaining the independence of its continuing medical education (CME) activities, the International Antiviral Society–USA (IAS–USA) requires all persons with control of educational content (eg, faculty, the Scientific Leadership Board, Governance Board, and program planners) to disclose any financial relationships with ineligible companies (previously defined as “commercial interests”) that they have had within the past 24 months. Any real or apparent conflicts of interest of those parties are resolved and mitigated prior to the delivery of the CME activity. Individuals who refuse to disclose financial interests may not participate in IAS–USA CME activities.

The Accreditation Council for Continuing Medical Education (ACCME) defines ineligible companies as “those whose primary business is producing, marketing, selling, re-selling, or distributing healthcare products used by or on patients.”

IAS–USA will identify and resolve ahead of time any possible conflicts of interest that may influence CME activities with regard to exposition or conclusion. Information about financial relationships with ineligible companies for the presenters and planners/reviewers will be available in the slides prior to the presentation of educational content.

Drug and Product Disclaimer

This activity may contain information about the investigational uses of drugs or products that are not approved by the US Food and Drug Administration. Please consult full prescribing information before using any medication or product mentioned in this activity.

GENERAL CONFERENCE INFORMATION

Overview

CROI was established in 1993 to provide a forum for basic scientists and clinical investigators to present, discuss, and critique their investigations into the epidemiology and biology of human retroviruses and associated diseases. The synergy of basic science and clinical investigation has been a major contributor to the success of the meeting. CROI is the preeminent HIV research meeting in the world and includes up to 4000 HIV research and care leaders internationally. CROI has facilitated the presentation of important discoveries in the field, thereby accelerating progress in HIV and AIDS research.

Funding and Grant Support

CROI seeks grants from commercial companies, particularly from companies with competing products. These companies have no input or control over the selection of faculty, the content of the CME portions of the program, or the abstract review and selection processes. This support is used to cover some of the costs of the venue, audiovisual services, and other conference expenses. CROI 2024 received grant support commitments from the following:

Platinum

Gilead Sciences, Inc
Merck & Co., Inc.
ViiV Healthcare

Silver

Janssen Therapeutics

Bronze

Hologic
Theratechnologies, Inc.

Additional support received after the printing of this program guide will be announced during the Conference.

Affiliated and Proximate Activities

CROI promotes the meaningful and high-level interchange of scientific ideas to improve the treatment of HIV and AIDS and to one day see HIV and other viral infections, including hepatitis viruses, SARS-CoV-2, and mpox virus, eradicated. In keeping with this goal, certain organizations (eg, commercial companies and their agents, not-for-profit groups, research study groups, and government agencies) have been approved to host Affiliated or Proximate Activities occurring outside CROI session times. Affiliated or Proximate Activities are not sponsored, endorsed, or supported by the IAS–USA, the CROI foundation, or CROI 2024. An Affiliated or Proximate Activity is any activity, event, or meeting held at any time from 3 days before (Thursday, February 29) through 2 days after (Friday, March 8) CROI 2024 and targeted toward or including any registrants of CROI.

If an activity is found to have violated the Guidelines for Affiliated or Proximate Activities, the sponsoring organization, the supporting organization, or the organizer of the meeting may be prohibited from holding an Affiliated or Proximate Activity at future CROI conferences and may have their current registration revoked. Noncompliance may be subject to fines and could negatively impact the registration and attendance of anyone attending an unapproved activity.

In the spirit of CROI and the goal of promoting scientific collaboration among colleagues, if you are invited to or are attending a meeting or activity that you think may not have been approved by CROI, please contact an IAS–USA staff member in the IAS–USA office.

Conference Badges

Badge pickup is available at the registration lobby; please bring government-issued photo identification that clearly shows your name. The CROI badge must be worn at all times during the conference to gain entry to all official meeting activities, including the poster sessions. Attendees will not be admitted into the meeting spaces without their CROI badge. THE CROI BADGE AND CONFIRMATION NUMBER MAY ONLY BE USED BY THE REGISTRANT AND CANNOT BE TRANSFERRED TO OR SHARED WITH OTHERS. USING ANOTHER INDIVIDUAL'S BADGE OR CONFIRMATION NUMBER TO GAIN ACCESS TO THE CONFERENCE VENUE, APP, OR OTHER RESOURCES IS STRICTLY PROHIBITED AND A VIOLATION OF CROI POLICIES.

DO NOT LOSE YOUR BADGE. Payment equivalent to the full registration fee will be required to replace a lost badge.

Conference Etiquette

Please ensure all mobile devices are turned off or set to SILENT mode in session rooms. In consideration for the work of the presenters at CROI and the CROI copyright policy, attendees may not photograph posters, record parts of talks, or post data without the presenter's consent.

Out of respect for the presenters and conference attendees, children are not permitted in meeting rooms, including the poster halls.

COVID-19 Protocol

Although masking is not mandatory, we are mask-friendly and support anyone who wishes to wear a mask. Prior to your departure, we encourage you to take a COVID-19 test to ensure it is safe to travel and to follow CDC guidelines with regard to appropriate precautions and self-isolation.

A limited number of rapid antigen tests are available on a first-come, first-served basis at the Attendee Services desk in Lobby D, Meeting Room (Street) Level.

Americans With Disabilities Act

CROI endeavors to comply fully with the legal requirements of the Americans with Disabilities Act (ADA). Please visit the Attendee Services desk in Lobby D, Meeting Room (Street) Level, for information about accessibility services, including designated handicapped parking, seating for attendees with mobility needs, and listening devices for individuals who are hard of hearing.

ABSTRACT PROCESS

Abstract Content

Author names, institutions, titles, and abstracts in the CROI Program and Information Guide, Abstract eBook, Mobile App, and other materials are presented largely as submitted by the submitting author. The submitting author is responsible for ensuring that all coauthors have reviewed and approved the abstract before submission and for providing complete, including email addresses.

THE SUBMITTING AUTHOR MUST ENSURE THAT THE EMAIL ADDRESSES OF ALL LISTED AUTHORS IN THEIR SUBMISSION ARE CORRECT for authors to receive important information regarding dispositions, presentation details, registration and housing information, and other CROI-related announcements.

Special Notes on Abstract Content

Tables and Figures

Each figure, table, or other graphic was reviewed in a blinded fashion by a 3-person panel. For reviews without unanimous consensus, the table, figure, or other graphic was assessed by an additional reviewer from the Scientific Program Committee. The inclusion of a figure, table, or other graphic must conform to the guidelines around length, size, complexity, and legibility. Elements that did not meet these guidelines were removed from consideration from the review process and, if the abstract was accepted, from inclusion in the eAbstract Book. For more information and examples, please visit <https://www.croiconference.org/common-reasons-for-removal-of-table-and-figure/>

People-First Language and the Use of Appropriate Terminology

CROI strongly advocates for the use of and strives to incorporate “people-first” language and acceptable terminology in all CROI-related written materials and presentations. All abstract authors and presenters should apply the following basic principles of appropriate language and terminology, including:

- Describe populations as “people, persons, or individuals with HIV” rather than “HIV-infected people, persons, or individuals.”
- Do not characterize people by their disease, infection, or condition; instead, use “people who inject drugs,” “individuals with cirrhosis,” or other similar constructs.
- Do not describe people enrolled in research studies or clinical trials as “subjects” or “patients.” Acceptable terms are research or clinical trial “participants” or “volunteers.”
- Ensure the correct use of the terms “sex” (refers to biologic sex at birth) and “gender” (refers to psychosocial or cultural identity). Appropriate corollary terms are “cisgender” (people whose gender matches their sex assigned at birth) or “transgender” (people whose gender does not match the sex assigned at birth).
- Do not use the term “sterilizing” when referring to HIV cure; it triggers a negative perception in many people due to historic sterilization campaigns and may discourage participation in research.

Presenting Author Responsibilities

The presenting author is responsible for presenting the abstract at the conference; poster presenters must be present at the poster during the entire assigned session. Submitting authors are responsible for ensuring that all coauthors have reviewed and approved the abstract contents before submission.

Embargo Policies and Social Media

All research presented at CROI 2024 is embargoed until the conclusion of the study's presentation at the conference or after presentation at a press conference. For example, if a study is presented from 2:15 PM to 2:23 PM, as part of a session that begins at 2:00 PM and ends at 3:00 PM, the embargo on that study lifts at 2:23 PM. Embargoes on poster presentations lift at the beginning of the session in which the poster is presented. If a study to be presented at CROI 2024 is included in an official CROI press conference that takes place before the scheduled presentation of the study, the embargo on that study lifts at the conclusion of the press conference panel in which the study is featured. No public dissemination of research information from the conference is permitted prior to the lifting of the conference embargo.

CROI embargo policies apply to any public dissemination of research information presented at the conference, including electronic publications (eg, blogs), or social media (eg, X [formerly Twitter], Instagram, Facebook, etc). Individuals or organizations that violate the conference embargo policy may have their conference credentials revoked and may forfeit the opportunity to participate in future conferences.

Abstract Review Process

Each abstract was assigned to approximately 10 reviewers selected for each abstract category based on their individual expertise.

Abstracts were reviewed for the quality and originality of the work and were scored numerically. All reviewers were instructed to abstain from scoring any abstract on which they are an author or coauthor, have a financial or personal conflict of interest, or do not have the appropriate expertise to evaluate.

Scores for each abstract were averaged and the standard deviation was calculated to assess variability. If variability was high, outlier scores were discussed. Abstracts were accepted for oral presentations, for poster presentations, or rejected. Late breaking abstract reviews included an assessment of the late-breaking nature of the work (distinct from a late submission, as they must meet a high threshold of scientific merit).

For more information, including common reasons for abstract rejection, visit the Abstract Guidelines page of www.CROIconference.org

SCHOLARSHIP AWARDEE INFORMATION

CROI is committed to supporting new and early-career investigators, as well as community educators and international investigators working in resource-limited countries who would otherwise be unable to attend CROI. Through their applications and letters of recommendation, these awardees have shown they will greatly benefit from attending CROI. New Investigator and International Scholarship recipients are presenting authors on their respective abstracts and are labeled as such through the program.

Activities for New Investigator Scholarship Awardees

Scott M. Hammer Workshop for New Investigators and Trainees

Widely considered the most informative and comprehensive session at CROI, this workshop highlights advances in HIV and SARS-CoV-2 molecular virology and immunology; advances in HIV treatment strategies, biomedical prevention, and cure; and community perspectives. Scholarship awardees are required to attend the entire workshop.

Meet the Luminary Sessions

Small-group sessions provide the unique opportunity to meet and network with a leading scientific expert (eg, a named lecturer or plenary speaker at CROI) and to ask one-on-one questions in an intimate setting. Note: Sign-up in advance is required.

Poster Walks

Poster Walks promote a rich scientific discourse between scholarship awardees, poster presenters, and CROI Scientific Program Committee members as they discuss a curated list of presentations in basic science, clinical research, epidemiology, and public health. Each New Investigator Scholarship Awardee can attend a single Poster Walk session. Note: Sign-up in advance is required.

New Investigator Networking Area

Located in the Poster Hall (Poster Hall C-D, Exhibit Level), the New Investigator Networking Area provides a central meeting point and designated networking area for New Investigator Scholarship Awardees.

Activities for Community Educator Scholarship Awardees

Scott M. Hammer Workshop for New Investigators and Trainees

Scholarship awardees are required to attend the entire workshop. Please refer to the description above for further details.

Virtual Community Networking Breakfast Club

Coordinated by the CROI Community Liaisons and their global collaborators, these virtual meetings feature researchers and advocates discussing some of the most consequential science presented at CROI 2024. Open to CROI registrants and nonregistrants alike, these Zoom webinars will take place March 4, 5, and 6 from 7:00 AM MT to 8:00 AM MT.

Meet the Luminary Sessions

Small-group sessions for Community Educator Scholarship Awardees provide the unique opportunity to network with a leader in the field (eg, Community Educator mentor, or Program Committee member) and ask one-on-one questions in a small-group setting. Note: Sign-up in advance is required.

Poster Walks

Community Educator Scholarship Awardees can attend a single Poster Walk session. Please refer to the description above for further details. Note: Sign-up in advance is required.
